

## **PARBOILING OF PADDY**

**Technology:**

Manufacture of parboiled paddy.

**Application and Use:**

The paddy soaked in water, boiled and drained to prepare parboiled paddy.

**Salient Features of Technology:**

Parboiled paddy is consumed in large parts of India for their better nutritional qualities. Milling of parboiled paddy gives more head rice yield with lesser brokens with the main by-product namely, the bran containing higher oil content.

**Equipment and Machinery:** Elevators, soaking and steaming tanks, conveyors and dryers.

**Raw Material:** Raw paddy.

**Status of Commercialization** : Design drawings available

**Minimum Economic Unit Size (MEUS)** : 2 TPH
