

ANIMAL FEED

Technology :

Production of animal feed formulations.

Applications and Use :

For feeding poultry (chick mash, growers mash, layers mash, broiler starter, broiler finisher) and cattle (calves, milch cows and draught animals).

Salient Features of Technology :

The raw materials such as jowar, ragi, broken wheat, maize, tapioca, rice bran (de-oiled), rice bran whole, gram husk, groundnut cake, sunflower cake, wheat bran / husk, fish meal, dried fish, etc. are cleaned, pulverised, mixed and molassed. The feed increases the yield of milk. The broiler takes 7 – 8 weeks to attain weight up to 2.0 kg. The product is packed in HDPE sacks.

Equipment and Machinery : Screw conveyor, single deck vibroscreen, bucket elevator, hammer mill, suction blower, batch mixer, aspirator and bagging and conveying system.

Raw Materials : As mentioned above.

Status of Commercialization : Commercialized

Minimum Economic Unit Size (MEUS) : 10 MT/Day
